

1- Find all the defects in the image of the Google Home page

2- Think about an electronic alarm clock and write all possible tests you could write to test that the clock is working correctly.

3- There is a simple program with the following items:

- Input Box A
- Input Box B
- ADD button
- Result Text Box [=A+B]

Identify all the test cases for the program.

4- Exercise 3 [Room Test]

List the defects/enhancements in the room you are in right now. [For example: there are dirty marks on the wall; the lighting could be better]
